Independent Auditors' Review Report

The Board of Director's
Emerging Display Technologies Corp

Introduction

We have reviewed the accompanying consolidated balance sheets of Emerging Display Technologies Corp. (the Company) and subsidiaries as of June 30, 2021 and 2020, and the related consolidated statements of comprehensive income for the three months and the six months ended June 30, 2021 and 2020, and changes in equity and cash flows for the six months ended June 30, 2021 and 2020, and notes to the consolidated financial statements, including a summary of significant accounting policies. Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34, "Interim Financial Reporting" endorsed issued into effect by the Financial Supervisory Commission of the Republic of China. Our responsibility is to express a conclusion on the consolidated financial statements based on our reviews.

Scope of Review

Except as explained in the Basis for Qualified Conclusion paragraph, we conducted our reviews in accordance with Statement of Auditing Standards 65, "Review of Financial Information Performed by the Independent Auditor of the Entity". A review of the consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with the generally accepted auditing standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Basis for Qualified Conclusion

As stated in Note 4(b), the consolidated financial statements included the financial statements of certain nonsignificant subsidiaries, which were not reviewed by independent accountants. These financial statements reflect total assets amounting to \$244,409 thousand and \$207,986 thousand, constituting 6.77% and 5.7% of consolidated total assets as of June 30, 2021 and 2020, respectively, total liabilities amounting to \$103,173 thousand and \$74,892 thousand, constituting 6.08% and 4.23% of consolidated total liabilities as of June 30, 2021 and 2020, respectively, and total comprehensive income amounting to loss \$15,232 thousand, loss \$37,368 thousand, loss \$18,500 thousand and loss \$34,609 thousand, constituting 49.20%, 44.40%, 15.13% and 30.45% of consolidated total comprehensive income for the three months and the six months ended June 30, 2021 and 2020, respectively.

Qualified Conclusion

Based on our reviews, except for the effects of the adjustments, if any, as might have been determined to be necessary had the financial statements of certain consolidated subsidiaries and equity accounted investee companies described in the Basis for Qualified Conclusion paragraph above been reviewed by independent accountants, nothing has come to our attention that causes us to believe that the accompanying consolidated financial statements do not present fairly, in all material respects, the consolidated financial position of the Company as of June 30, 2021 and 2020, and its consolidated financial performance for the three months and six months ended June 30, 2021 and 2020, as well as its consolidated cash flows for the six months ended June 30, 2021 and 2020 in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and the International Accounting Standard 34, “Interim Financial Reporting” endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China.

The engagement partners on the audit resulting in this independent auditors’ review report are Po Jen, Yang and Yen Ta, Su.

The first to fourth phase will decrease by 12.5% of the effective credit line and the fifth phase will decrease by 50% which will repay the total borrowing upon maturity. The Group borrowed the amount of \$400,000 on February 5, 2021, by issued Commercial paper. Restrictions related to the contract are as follows:

The Group's exposure to foreign currency risk arises from the translation of the cash and cash equivalents, accounts receivables, other receivables, financial assets and liabilities at fair value through profit or loss, financial assets measured at fair value through other comprehensive income, accounts payables, and other payables. As of June 30, 2021 and 2020, if the exchange rate of the TWD versus the USD, CNY, JPY, and EUR have increased or decreased by 1%, given no changes in other factors, profit after tax would have increased or decreased by \$5,319 and \$12,812, respectively, and equity will increase or decrease by \$108 and \$113, respectively. The analysis is performed on the same basis of prior year.

The Group has variety kinds of functional currencies, hence we use summarized method to disclose exchange gain (loss) of monetary items. For the three months and the six months ended June 30, 2021 and 2020, foreign exchange gain or loss (including realized and unrealized) amounted to loss \$15,741, loss \$20,883, loss \$23,830 and loss \$2,626, respectively.

2) Interest rate analysis

Please refer to liquidity risk management for the detail of the Group's financial liabilities' interest exposure.

The sensitivity analysis of interest was made based on the interest rate of derivative and non-derivative instruments at the reporting date. The analysis of liabilities bearing floating interest rates was prepared based on the assumption that the outstanding amount at the reporting date had existed for the whole year. When internal report to the Group's top management regarding the interest rate change, they use 0.25% increase or decrease of interest rate assumption as the interest rate change which also represents this is the reasonable interest rate range assessed by the top management.

If interest rates on loans had increased or decreased by 0.25% with all other variables held constantly. The impact on the Group will be as follows :

For the six months ended June 30			
2021		2020	
Increase 0.25%	Decrease 0.25%	Increase 0.25%	Decrease 0.25%
After-tax profit	After-tax profit	After-tax profit	After-tax profit
\$ 508	508	560	560

The above-mentioned variables attribute to the Group's change of interest rate on loan.

3) Other price risk

If the prices of financial instrument change at reporting date, with all other variables held constant, the influences were as follows :

Notes to consolidated financial statements

The Group measures its assets and liabilities use input observable market data. The fair value hierarchy categorizes the inputs used in valuation techniques are as follows :

- Level 1: quoted prices (unadjusted) in the active markets for identified assets or liabilities.
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

2) Valuation techniques and assumptions unused in fair value determination

(A) Financial assets measured at amortized cost

If the quoted prices in active markets are available, the market price is established as the fair value. However, if quoted prices in active markets are not available, the fair value will be estimated by valuation technique or the prices quoted by competitors.

(B) Financial assets and financial liabilities measured at amortized cost

If there is quoted price generated by transactions, the recent transaction price and quoted price data is used as the basis for fair value measurement. However, if no quoted prices are available, the discounted cash flows are used to estimate fair values.

3) Valuation techniques and assumptions used in fair value determination

Non-derivative instruments

If a financial instrument has a quoted price in an active market, the quoted price is used as fair value. Quoted prices of major stock exchanges and quoted prices of government bonds are the basis for measuring the fair value of stocks listed on an exchange, stocks listed on the OTC, and debt instruments with quoted prices in an active market.

The fair values of the Group's listed securities and open-end funds with standard terms and conditions and traded in active markets are determined by the quoted market prices.

Measurements of fair value of financial instruments without active market are based on valuation technique. Fair value measured by valuation technique can be extrapolated from similar financial instruments, discounted cash flow method or other valuation technique. Using discounted cash flow method to calculate fair value, the main assumption is to reflect monetary time value and return of invest risk to discount and measure based on investee's estimated future cash flow.

Derivative instruments

The fair value of Swap contracts is based on quoted prices from the counterparty.

4) Transfer between level 1 and level 2

There was no transfer between the fair value hierarchy levels for the year ended June 30, 2021 and 2020.

- 6) Quantified information on significant unobservable inputs (Level 3) used in fair value measurement

The Group's financial instruments that use Level 3 inputs to measure fair value include financial assets measured at fair value through other comprehensive income— equity investments.

The Group's equity investments without active market in Level 3 have more than one significant unobservable input. The significant unobservable inputs of equity investments without active market are individually independent, and there is no correlation between them.

Quantified information of significant unobservable inputs was as follows :

Item	Valuation technique	Significant unobservable inputs	Inter-relationship between significant unobservable inputs and fair value measurement
Financial assets at fair value through other comprehensive income-equity investments without an active market	Discounted Cash Flow Method	<ul style="list-style-type: none"> • Continuing growth rate • (as of June 30, 2021, December 31, 2020 and June 30, 2020 ranged from 0.48%、0.48% and 2.10% respectively) • Weighted average cost of capital (as of June 30, 2021, December 31, 2020 and June 30, 2020 ranged from 10.20%、10.52% and 9.47% respectively) • Market illiquidity discount rate (as of June 30, 2021, December 31, 2020 and June 30 2020 ranged from 59.80%、60.73% and 42.12% respectively) • Non-controlling interests discount rate • (as of June 30, 2021, December 31, 2020 and June 30, 2020 were 29.87%) 	<ul style="list-style-type: none"> • If the continuing growth rate was higher, the estimated fair value would increase. • If WACC was higher, the estimated fair value would decrease. • If the market illiquidity discount rate was higher, the estimated fair value would decrease. • If the non-controlling interests discount rate was higher, the estimated fair value would decrease.

7) Fair value measurements in Level 3 – sensitivity analysis of reasonably possible alternative assumption

The Group's measurement on the fair value of financial instruments is deemed reasonable despite different valuation models or assumptions may lead to different results. For fair value measurements in Level 3, changing one or more of the assumptions would have the following effects on other comprehensive income :

<u>Inputs</u>	<u>Fluctuation in inputs</u>	<u>Changes in fair value reflected in OCI</u>	
		<u>Favorable</u>	<u>Unfavorable</u>
June 30, 2021			
Continuing growth rate 0.48%	0.1%	\$ 560	560

Non-controlling interests discount rate 29.87%	1%	1,260	1,260

The favorable and unfavorable effects represented the changes in fair value, and fair value was based on a variety of unobservable inputs calculated using a valuation technique. The analysis above only reflected the effects of changes in a single input, and it did not include the interrelationships and variances with another input.
