## **Independent Auditors' Review Report**

The Board of Director's  
Emerging Display Technologies Corp

### **Introduction**

We have reviewed the accompanying consolidated balance sheets of Emerging Display Technologies Corp. (the Company) and subsidiaries as of March 31, 2023 and 2022, and the related consolidated statements of comprehensive income, changes in equity and cash flows for the three months ended March 31, 2023 and 2022, and notes to the consolidated financial statements, including a summary of significant accounting policies. Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34, "Interim Financial Reporting" endorsed issued into effect by the Financial Supervisory Commission of the Republic of China. Our responsibility is to express a conclusion on the consolidated financial statements based on our reviews.

### **Scope of Review**

Except as explained in the Basis for Qualified Conclusion paragraph, we conducted our reviews in accordance with ISRE 2410, "Review of Financial Information Performed by the Independent Auditor of the Entity". A review of the consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with the generally accepted auditing standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

### **Basis for Qualified Conclusion**

As stated in Note 4(b), the consolidated financial statements included the financial statements of certain nonsignificant subsidiaries, which were not reviewed by independent accountants. These financial statements reflect total assets amounting to \$449,047 thousand and \$295,368 thousand, constituting 10.70% and 7.95% of consolidated total assets as of March 31, 2023 and 2022, respectively, total liabilities amounting to \$109,842 thousand and \$89,963 thousand, constituting 5.49% and 5.26% of consolidated total liabilities as of March 31, 2023 and 2022, respectively, and total comprehensive gain (loss) amounting to loss \$13,558 thousand and gain \$17,913 thousand, constituting (11.48)% and 15.06% of consolidated total comprehensive gain (loss) for the three months ended March 31, 2023 and 2022, respectively.

### **Qualified Conclusion**

Based on our reviews, except for the effects of the adjustments, if any, as might have been determined to be necessary had the financial statements of certain consolidated subsidiaries and equity accounted investee companies described in the Basis for Qualified Conclusion paragraph above been reviewed by independent accountants, nothing has come to our attention that causes us to believe that the accompanying consolidated financial statements do not present fairly, in all material respects, the consolidated financial position of the Emerging Display Technologies Corp. and subsidiaries as of March 31, 2023 and 2022, and of its consolidated financial performance and its consolidated cash flows for the three months ended March 31, 2023 and 2022 in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34, “Interim Financial Reporting” endorsed by the Financial Supervisory Commission of the Republic of China.

The engagement partners on the audit resulting in this independent auditors’ review report are, Yung Hsiang, Chen and Yen Ta, Su.

## EMERGING DISPLAY TECHNOLOGIES CORP. AND SUBSIDIARIES

### Notes to consolidated financial statements

The Group's exposure to foreign currency risk arises from the translation of the cash and cash equivalents, accounts receivable, other receivables, financial assets and liabilities measured at fair value through profit or loss, financial assets measured at fair value through other comprehensive income, accounts payables, and other payables. As of March 31, 2023 and 2022, if the exchange rate of the TWD versus the USD, CNY, JPY, and EUR have increased or decreased by 1%, given no changes in other factors. For the three months ended March 31, 2023 and 2022, profit after tax would have increased or decreased by \$11,043 and \$4,551, and other comprehensive income after tax would have increased or decreased by \$481 and \$0, respectively. The analysis is performed on the same basis of prior year.

The Group has variety kinds of functional currencies, hence we use summarized method to disclose exchange gain (loss) of monetary items. For the three months ended March 31, 2023 and 2022, foreign exchange gain (including realized and unrealized) amounted to lose \$12,945 and gain \$33,535, respectively.

#### 2) Interest rate analysis

Please refer to liquidity risk management for the detail of the Group's financial liabilities' interest exposure.

The sensitivity analysis of interest was made based on the interest rate of derivative and non-derivative instruments at the reporting date. The analysis of liabilities bearing floating interest rates was prepared based on the assumption that the outstanding amount at the reporting date had existed for the whole year. When internal report to the Group's top management regarding the interest rate change, they use 0.25% increase or decrease of interest rate assumption as the interest rate change which also represents this is the reasonable interest rate range assessed by the top management.

If interest rates on loans had increased or decreased by 0.25% with all other variables held constantly, Profit after tax for the three months ended March 31, 2023 and 2022 would have been decreased or increased by \$325 and \$200, respectively, mainly as a result of liabilities bearing floating interest rates.

#### 3) Other price risk

If the prices of financial instrument change at reporting date, with all other variables held constant, the influences were as follows :

<u>Equity price at reporting date</u>	<b>For the three months ended March 31</b>			
	<b>2023</b>		<b>2022</b>	
	<b>Other comprehensive income after tax</b>	<b>Net profit (loss)</b>	<b>Other comprehensive income after tax</b>	<b>Net profit (loss)</b>

Decrease 3%	<b>\$ (16,946)</b>	<b>(733)</b>	<b>(15,999)</b>	<b>-</b>

#### (iv) Fair value

##### 1) Categories and fair values of financial instruments

### Notes to consolidated financial statements

The Group measures its assets and liabilities use input observable market data. The fair value hierarchy categorizes the inputs used in valuation techniques are as follows :

- Level 1: quoted prices (unadjusted) in the active markets for identified assets or liabilities.
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

#### 2) Valuation techniques and assumptions used in fair value determination

##### Non-derivative instruments

If a financial instrument has a quoted price in an active market, the quoted price is used as fair value. Quoted prices of major stock exchanges and quoted prices of government bonds are the basis for measuring the fair value of stocks listed on an exchange, stocks listed on the OTC, and debt instruments with quoted prices in an active market.

The fair values of the Group's listed securities and open-end funds with standard terms and conditions and traded in active markets are determined by the quoted market prices.

Measurements of fair value of financial instruments without active market are based on valuation technique or quoted price from competitor. Fair value measured by valuation technique can be extrapolated from similar financial instruments, discounted cash flow method or other valuation technique. Using discounted cash flow method to calculate fair value, the main assumption is to reflect monetary time value and return of invest risk to discount and measure based on investee's estimated future cash flow.

##### Derivative instruments

The fair value of Swap contracts and Forward exchange contract is based on quoted prices from the counterparty.

#### 3) Transfer between level 1 and level 2

There was no transfer between the fair value hierarchy levels for the year ended March 31, 2023 and 2022.

- 5) Quantified information on significant unobservable inputs (Level 3) used in fair value measurement

The Group's financial instruments that use Level 3 inputs to measure fair value include financial assets measured at fair value through other comprehensive income— equity investments.

The Group's equity investments without active market in Level 3 have more than one significant unobservable input. The significant unobservable inputs of equity investments without active market are individually independent, and there is no correlation between them.

Quantified information of significant unobservable inputs was as follows :

Item	Valuation technique	Significant unobservable inputs	Inter-relationship between significant unobservable inputs and fair value measurement
Financial assets at fair value through other comprehensive income-equity investments without an active market	Discounted Cash Flow Method	<ul style="list-style-type: none"> <li>• Continuing growth rate (as of March 31,2023, December 31,2022 and March 31, 2022 was 1.44%)</li> <li>• Weighted average cost of capital (as of March 31,2023, December 31,2022 and March 31, 2022 ranged from 13.7754%、12.0298% and 9.01% respectively)</li> <li>• Market illiquidity discount rate (as of March 31,2023, December 31,2022 and March 31, 2022 ranged from 32.51%、33.76% and 53.63% respectively)</li> <li>• Non-controlling interests discount rate (as of March 31,2023, December 31,2022 and March 31, 2022 was 29.48%)</li> </ul>	<ul style="list-style-type: none"> <li>• If the continuing growth rate was higher, the estimated fair value would increase.</li> <li>• If WACC were higher, the estimated fair value would decrease.</li> <li>• If the market illiquidity discount rate was higher, the estimated fair value would decrease.</li> <li>• If the non-controlling interests discount rate was higher, the estimated fair value would decrease.</li> </ul>
