

May 2020

In 2018 we launched our Smart Embedded Display and we are happy to say that it is a success. That is why we have decided to make this dedicated Smart Embedded website – and we invite you to explore it.

The new website has been designed to offer the ultimate user-friendly experience with improved navigation and functionality while allowing customers to get more knowledge about Smart Embedded Displays benefits and easily get in touch with us or our partners. Keep up to date on our latest workshops, trade shows, seminars and company announcements in our news section.

EDT's Smart Embedded product integrates everything into one module with full warranty and it can be delivered programmed and tested according to an agreed Test Specification. Smart Embedded solution saves time in logistic handling and transportation because most is done in-house at EDT, so less risk of delays, less time consumed, less cost and less CO2 emission. Smart Embedded solution is based on in-house development and in-house produced parts. Therefore, it is the convenient choice to make work easier – and your display Smarter!

Enjoy and view - visit www.smartembeddeddisplay.com!
