Independent Auditors' Review Report

The Board of Director's
Emerging Display Technologies Corp

Introduction

We have reviewed the accompanying consolidated balance sheets of Emerging Display Technologies Corp. (the Company) and subsidiaries as of September 30, 2021 and 2020, and the related consolidated statements of comprehensive income for the three months and the nine months ended September 30, 2021 and 2020, and changes in equity and cash flows for the nine months ended September 30, 2021 and 2020, and notes to the consolidated financial statements, including a summary of significant accounting policies. Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34, "Interim Financial Reporting" endorsed issued into effect and by the Financial Supervisory Commission of the Republic of China. Our responsibility is to express a conclusion on the consolidated financial statements based on our reviews.

Scope of Review

Except as explained in the Basis for Qualified Conclusion paragraph, we conducted our reviews in accordance with Statement of Auditing Standards 65, "Review of Financial Information Performed by the Independent Auditor of the Entity". A review of the consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with the generally accepted auditing standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Basis for Qualified Conclusion

As stated in Note 4(b), the consolidated financial statements included the financial statements of certain nonsignificant subsidiaries, which were not reviewed by independent accountants. These financial statements reflect total assets amounting to \$281,045 thousand and \$209,702 thousand, constituting 7.77% and 5.40% of consolidated total assets as of September 30, 2021 and 2020, respectively, total liabilities amounting to \$93,273 thousand and \$71,778 thousand, constituting 5.73% and 3.67% of consolidated total liabilities as of September 30, 2021 and 2020, respectively, and total comprehensive income amounting to loss \$7,672 thousand, profit \$12,126 thousand, loss \$26,172 thousand and loss \$46,735 thousand, constituting 11.97%, 32.57%, 14.04% and 30.98% of consolidated total comprehensive income for the three months and the nine months ended September 30, 2021 and 2020, respectively.

Qualified Conclusion

Based on our reviews, except for the effects of the adjustments, if any, as might have been determined to be necessary had the financial statements of certain consolidated subsidiaries and equity accounted investee companies described in the Basis for Qualified Conclusion paragraph above been reviewed by independent accountants, nothing has come to our attention that causes us to believe that the accompanying consolidated financial statements do not present fairly, in all material respects, the consolidated financial position of the Emerging Display Technologies Corp. and subsidiaries as of September 30, 2021 and 2020, and of its consolidated financial performance for the three months ended September 30, 2021 and 2020 and its consolidated financial performance, and its consolidated cash flows for the nine months ended September 30, 2021 and 2020 in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34, “Interim Financial Reporting” endorsed by the Financial Supervisory Commission of the Republic of China.

The engagement partners on the audit resulting in this independent auditors’ review report are Po Jen, Yang and Yen Ta, Su

Notes to consolidated financial statements

The Group signed a 5 year syndicated loan contract with E.SUN bank and six other banks at May 15, 2020, with a revolving credit line of \$800,000 from the first appropriation date to maturity date, wherein \$800,000 can be appropriated by using the bank's own fund and \$600,000 by issuing commercial paper, and the combined credit line should not exceed \$800,000. According to the loan contract, the date after 9 months when the contract was signed will be considered as the first appropriation date even if the credit line is unused after 9 months. The credit line will decrease every 6 months since 36-month after the first appropriation date with total five year to decrease the credit line. The first to fourth phase will decrease by 12.5% of the effective credit line and the fifth phase will decrease by 50% which will repay the total borrowing upon maturity. The Group borrowed the amount of \$400,000 on February 5, 2021, by issued Commercial paper. Restrictions related to the contract are as follows:

Pursuant to the loan contract, for the duration of the loan the Group must conform to the predetermined financial covenants involving special financial ratios calculated based on the annual consolidated financial statements. If the special financial ratios cannot meet the requirement, the Group should improve within nine months after the end of the fiscal year. If the adjusted financial ratios reviewed by the certified accountant meet the requirements, it will not be regarded as breach of the contract. During the period for adjustment, unused lines of credit, excluding the revolving credit extension, will be suspended until such ratios are in compliance with the contract requirement. But during the said period, the interest rate would increase additional 1.25%. If the special financial ratios cannot meet the requirement, the majority of the banks should resolve if they agree to waive the violation of the financial ratio. Before the decision of most credit banks, the violation of the financial ratio will not be regarded as breach of the contract.

- (i) A minimum current ratio of 100% should be maintained.
- (ii) A maximum debt ratio of 150% should be maintained.
- (iii) A minimum times interest earned ratio of 2.5 should be maintained.

As of September 30, 2021 and 2020, the exchange rate of the TWD versus the USD, CNY, JPY, and EUR increases or decreases by 1%, given no changes in other factors, profit after tax will increase or decrease by \$6,839 and \$11,468, respectively, and equity will increase or decrease by \$110 and \$108, respectively. The analysis assumes that all other variables remain constant.

The Group has variety kinds of functional currencies; hence we use summarized method to disclose exchange gain or loss of monetary items. For the three months and the nine months ended September 30, 2021 and 2020, the exchange gains or loss (including realized and unrealized) that resulted from monetary items translated to the functional currency was \$2,532, (\$30,740), (\$21,298) and (\$33,366), respectively.

2) Interest rate risk

Please refer to liquidity risk management for the detail of the Group's financial liabilities' interest exposure.

The sensitivity analysis of interest was made based on the interest rate of derivative and non-derivative instruments at the reporting date. The analysis of liabilities bearing floating interest rates was prepared based on the assumption that the outstanding amount at the reporting date had existed for the whole year.

When internal report to the Group's top management regarding the interest rate change, they use 0.25% increase or decrease of interest rate assumption as the interest rate change which also represents this is the reasonable interest rate range assessed by the top management.

EMERGING DISPLAY TECHNOLOGIES CORP. AND SUBSIDIARIES

The Group measures its assets and liabilities use input observable market data. The fair value hierarchy categorizes the inputs used in valuation techniques are as follows:

- Level 1: quoted prices (unadjusted) in the active markets for identified assets or liabilities.
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

2) Valuation techniques and assumptions unused in fair value determination

A. Financial assets measured at amortized cost

If the quoted prices in active markets are available, the market price is established as the fair value. However, if quoted prices in active markets are not available, the fair value will be estimated by valuation technique or the prices quoted by competitors.

EMERGING DISPLAY TECHNOLOGIES CORP. AND SUBSIDIARIES

Notes to consolidated financial statements

B. Financial assets and financial liabilities measured at amortized cost

If there is quoted price generated by transactions, the recent transaction price and quoted price data is used as the basis for fair value measurement. However, if no quoted prices are available, the discounted cash flows are used to estimate fair values.

3) Valuation techniques and assumptions used in fair value determination

Non-derivative instruments

If a financial instrument has a quoted price in an active market, the quoted price is used as fair value. Quoted prices of major stock exchanges and quoted prices of government bonds are the basis for measuring the fair value of stocks listed on an exchange, stocks listed on the OTC, and debt instruments with quoted prices in an active market.

The fair values of the Group's listed securities and open-end funds with standard terms and conditions and traded in active markets are determined by the quoted market prices.

Measurements of fair value of financial instruments without active market are based on valuation technique. Fair value measured by valuation technique can be extrapolated from similar financial instruments, discounted cash flow method or other valuation technique. Using discounted cash flow method to calculate fair value, the main assumption is to reflect monetary time value and return of invest risk to discount and measure based on investee's estimated future cash flow.

Derivative instruments

The fair value of Swap contracts and Forward exchange contract is based on quoted prices from the counterparty.

4) Transfer between level 1 and level 2

There was no transfer between the fair value hierarchy levels for the nine months ended September 30, 2021 and 2020.

5) Movement of financial assets through other comprehensive income categorized within Level 3.

6) Quantified information on significant unobservable inputs (Level 3) used in fair value measurement

The Group's financial instruments that use Level 3 inputs to measure fair value include financial assets measured at fair value through other comprehensive income— equity investments.

The Group's equity investments without active market in Level 3 have more than one significant unobservable input. The significant unobservable inputs of equity investments without active market are individually independent, and there is no correlation between them. Quantified information of significant unobservable inputs was as follows :

Item	Valuation technique	Significant unobservable inputs	Inter-relationship between significant unobservable inputs and fair value measurement
Financial assets at FVOCI - equity investments without an active market	Discounted Cash Flow Method	<ul style="list-style-type: none"> • Continuing growth rate (as of September 30,2021, December 31,2020 and September 30, 2020 ranged from 0.48% 、0.48% and 2.10% respectively) • Weighted average cost of capital (as of September 30,2021, December 31,2020 and September 30, 2020 ranged from 10.20% 、10.52% and 9.79% respectively) • Market illiquidity discount rate (as of September 30,2021, December 31,2020 and September 30, 2020 ranged from 65.40% 、60.73% and 52.61% respectively) • Non-controlling interests discount rate (as of September 30,2021, December 31,2020 and September 30, 2020 were 29.87%) 	<ul style="list-style-type: none"> • The higher the continuing growth rate, the higher the fair value. • The higher the WACC, the lower the fair value. • The higher the market illiquidity discount rate, the lower the fair value. • The higher the non-controlling interests discount rate, the lower the fair value.

7) Fair value measurements in Level 3 – sensitivity analysis of reasonably possible alternative assumptions

The Group's measurement on the fair value of financial instruments is deemed reasonable despite different valuation models or assumptions may lead to different results.

For fair value measurements in Level 3, changing one or more of the assumptions would have the following effects on other comprehensive income :
